

Docket No. AUS9-2000-0384-US1

ABSTRACT OF THE DISCLOSURE

METHOD AND APPARATUS FOR SHARING INFORMATION IN A VIRTUAL ENVIRONMENT

A distributed data processing system provides a virtual workplace environment. The virtual workplace environment may be a three-dimensional model of an office, a conference room, or an entire office building complex. Participants are represented by three-dimensional avatars, which move within the virtual environment. Participants may also share data within the virtual environment. Two-dimensional data may be projected onto the surface of a three-dimensional object within the environment, such as a wall. Three-dimensional data may be rendered within the environment for the participants to inspect.
